

# POWER ASSIST HAND TRUCK

**B&P MANUFACTURING**  
Engineered Delivery Products

**NEW!**

## XCELORATOR

Putting safety at the forefront, your drivers can concentrate on maximum output, with less effort. The NEW XCELORATOR hand truck seamlessly transitions from manual or physical push/pull actions to powered with ease.

Drivers can simply go from powered to unpowered, with the simple use of a throttle.

### KEY FEATURES & BENEFITS:

- ▶ Use with heavy loads on inclines like loading dock ramps, sidewalk aprons, and curbs.
- ▶ Customizable powered hand truck options allow for various height drivers and different types of uses.
- ▶ The battery is easily interchangeable and can be charged in the cab or at the warehouse.
  - 40V DC, 6 Amp hours battery.
- ▶ The truck is light in weight and has a very low center of gravity centered around the wheel axle.
- ▶ Very low rolling resistance even with a dead battery, or without a battery entirely, it is a completely operable hand truck.
- ▶ Power driven assist wheels will not interfere with driver's legs or feet.
- ▶ Many modular B&P parts and components can be used to build to suit.
  - A variety of standard frames, nose plates and a large selection of standard handles are available.
- ▶ Motor kit adds minimal weight (less than 17 lb. to its standard counterpart).

**POWER ASSIST, FOR A LITTLE OR A LOT OF  
EXTRA HELP... ONLY WHEN YOU NEED IT!**

## COMPONENTS:

### A - HANDLE

- ▶ Large selection of available handles.
- ▶ Heat treated handle line available, providing nearly 1.5x greater strength & abrasion resistance to other handles or extensions.

### B - FRAME

- ▶ 600 lb. capacity.
- ▶ 4-sided ribbed cross members and top logo channel for rigidity & strength.
- ▶ Logo channel allows room for custom company decal.
- ▶ Curved cross member frames available w/ optional sliding keg hook.

### C - NOSE PLATE

- ▶ 600 lb. capacity extruded aluminum.
- ▶ Many options for widths & lengths.
- ▶ Beveled leading edge.
- ▶ 500 lb. capacity cast aluminum available.

### D - WHEEL

- ▶ Several 10" wheel options are available for your specific application.
- ▶ Premium pneumatics or traditional flat free options.

### E - BATTERY AND CHARGER

- ▶ 40V DC, 6 Amp hours.
- ▶ Power level indicator.
- ▶ Battery and electronics mounted on rear plate for ease of maintenance and access.
- ▶ Comes standard w/ 2 battery packs and (1) 110V charger.
- ▶ Enough battery power to last more than a typical work day.

### F - MOTOR

- ▶ Dual brushless ignition protected motors.
- ▶ Installed separately from the battery pack to allow easy access and maintenance.
- ▶ Belt driven = smooth & quiet.
- ▶ Driven reverse (switch activated).

### BTT - TREAD BRAKES (OPTIONAL)

- ▶ Brake shoe assembly designed for increased leverage, excellent load control and superior braking, even in adverse weather conditions.
- ▶ Most components are heavy gauge steel and powder coated for corrosion resistance and long life.

### ACCESSORIES

- ▶ Options include: frame extensions, tubular folding noses, frame wings, keg hook, retractable strap kit, carpeted back and much more.

### FEATURES

- ▶ Integrated stair climbers protect electronics from impacts.
- ▶ Extra thick reversible bolt-on wear strips outlast all others many times over.
- ▶ Standard kick bar makes it easier to break it back.
